

# **RESPATEX RECOMMENDED SEALANTS & ADHESIVES**

Respatex do not supply adhesives or sealants but we recommend the use of any of the following to complete the installation of Respatex panels. These items will be widely available from builders merchants or from the manufacturers websites.

## **POLYMER SEALANTS:**

### **TEC 7 (CONTECH)**

WEBSITE: <http://www.tec7.ie/products/tec7-sealant>

### **CT1 (C-TEC)**

WEBSITE: <http://www.ct1ltd.com/en/ct1.html>

### **SOUDASEAL 215 LM (SOUDAL)**

WEBSITE: <http://www.soudal.com/soudalweb/productDetail.aspx?w=8&p=498&ID=2590>

Important that this is not confused with Soudal Fix All which is much thicker (more viscous) and unsuitable for Respatex panels. The Soudaseal 215 LM is a low viscosity sealant.

## **ADHESIVES:**

### **NO MORE NAILS (UNIBOND)**

WEBSITE: <http://www.unibond.co.uk/en/diy-adhesives/no-more-nails/no-more-nails-original.html>

### **PINK GRIP (EVERBUILD)**

WEBSITE: <http://www.everbuild.co.uk/pinkgrip/pink-grip>
